REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The Applicant's invention relates to, as claimed in independent **claim 1**, a method for managing telecommunication bills for a subscriber, the method comprising the steps of:

- conducting an initial analysis of a subscriber's telecommunication usage requirements, wherein the initial analysis is based at least on the subscriber's predicted telecommunication usage requirements and the subscriber's historical telecommunication usage;
- creating a report based on the initial analysis of to the subscriber's telecommunication usage requirements;
- selecting at least one telecommunication carrier plan to conform to the initial analysis;
- receiving a subsequent bill from the carrier corresponding to the subscriber's actual telecommunication usage and containing an actual billed amount;
- comparing the subscriber's actual telecommunication usage to the initial analysis of the subscriber's telecommunication usage requirements to identify differences between the actual usage and the initial analysis;
- identifying instances in which such differences result in additional or unexpected charges;
- updating the initial analysis of the subscriber's telecommunication usage requirements based at least on the subscriber's actual telecommunication usage and on additional subscriber's predicted telecommunication usage requirements;

- comparing the updated analysis to the initial analysis to determine any differences between the updated analysis and the initial analysis;
- determining whether a different telecommunications plan better conforms to the updated analysis based on the comparison of the updated analysis to the initial analysis;
- selecting the different telecommunications plan when the determination indicates that the different telecommunications plan better conforms to the updated analysis;
- determining an anticipated billed amount based on the actual usage; comparing the anticipated billed amount to the actual billed amount ***to identify billing errors in the bill***; and
- creating an actual report for the subscriber.

The closest prior art relevant to the claimed invention cited by the Examiner:

- U.S. Patent Publication Number 2002/0120540 A1
- U.S. Patent Number 6,574,465
- U.S. Patent Publication Number 2004/0203587 A1

The closest relevant prior art, teaches of a system that analyzes service rate plans advantageous to the user, based on historical and other user specific information and preferences, current rate information for one or more services. Alternative plans are presented to the user wherein the user is allowed to choose a better plan, if a flat fee is paid in advance to do so.

Although the closest prior art is considered to constitute to the state of the claimed invention; however, in contrast with comparable differences, the Applicant claimed in **claim 1**, in addition to the comparing and creating alternative methods, which provides the user prevented measures to avoid additional and unexpected charges; also, compares the anticipated billing amount to actually billed amount to identify billing errors in the bill. The errors are reported in a as exceptions to the carrier which in turn is able to credit its customers according to the differences that were generated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
